DETAILED ACTION

This Office Action is in response to the Amendment filed on 09/29/2009. Applicant's cooperation in correcting the informalities in the drawing, Abstract, and specification is appreciated. Applicant's cooperation in amending the claims to overcome the claim objections relating to indefinite claim language is also appreciated.

Claims 1-10 were cancelled;

Claims 1, 21, and 30 were amended.

EXAMINER'S COMMENT

1. Drawings:

The Amendments to Drawings submitted on 09/29/2009 have been accepted.

2. Specification:

The Amendments to Abstract submitted on 09/29/2009 have been accepted.

The Amendments to Specification submitted on 06/15/2009 have been accepted.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the Prior Art fails to disclose or renders obvious the claimed combination of a hydrodynamic coupling for a turbine system of an internal combustion engine, the turbine system having an exhaust gas turbine,

Art Unit: 3748

the internal combustion engine having a crank shaft and an exhaust gas flow path, the coupling having a primary impeller; a secondary impeller; a working chamber defined at least in part by the primary and secondary impellers, the working chamber being filled with a working medium; and a switching member for reversing a direction of rotation of the primary impeller or the secondary impeller, and including:

“the switching member having a first switching state and a second switching state, the primary impeller and the secondary impeller rotating in opposite directions with respect to each other in the first switching state, and the primary impeller and the secondary impeller rotating in a same direction with respect to each other in the second switching state.”

Regarding claim 21, the Prior Art fails to disclose or renders obvious the claimed combination of a turbine system for an internal combustion engine having a crank shaft and an exhaust gas flow path, the system having an exhaust gas turbine in communication with the exhaust gas flow of the internal combustion engine; a hydrodynamic coupling having a primary impeller and a secondary impeller defining at least in part a working chamber filled with a working medium, the hydrodynamic coupling being operably connected between the crankshaft and the exhaust gas turbine, wherein driving power is transmitted from the exhaust gas turbine to the crankshaft when the working chamber is filled with the working medium; and a switching member for reversing a direction of rotation of the primary impeller or the secondary impeller, and including:

“the switching member has a first switching state and a second switching state, the primary impeller and the secondary impeller rotating in opposite directions with respect to each other in the first switching state,

Art Unit: 3748

and the primary impeller and the secondary impeller rotating in a same direction with respect to each other in the second switching state.”

Regarding claim 30, the Prior Art fails to disclose or renders obvious the claimed combination of a method for forming a counter-rotating hydrodynamic retarder having forming a working chamber of a hydrodynamic coupling by providing a primary impeller and a secondary impeller; filling the working chamber with a working medium; transmitting driving power from an exhaust gas turbine to a crankshaft of an internal combustion engine when the working chamber is filled with the working medium; and reversing a direction of rotation of the primary impeller or the secondary impeller by changing a direction of flow of an exhaust gas flow path of the internal combustion engine, and including:

“the primary impeller and the secondary impeller rotating in opposite directions with respect to each other in a first switching state, and the primary impeller and the secondary impeller rotating in a same direction with respect to each other in a second switching state.”

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
